

MT as Cross-Lingual Parsing

Overview of Cross-Lingual Parsing

Training JAMR

The tour was a surprise offer made by North Korea in November 2001.

```
(t / thing
  :ARG0-of (s / surprise-01)
  :ARG1-of (o / offer-01
    :ARG0 (c / country
      :name (n / name
        :op1 "North"
        :op2 "Korea"))
    :time (d / date-entity
      :month 11
      :year 2001))
  :domain (t2 / tour-01))
```

Need Alignments for Training JAMR

The **tour** was a **surprise offer** made by **North Korea** in **November 2001**.

```
(t / thing
  :ARG0-of (s / surprise-01)
  :ARG1-of (o / offer-01
    :ARG0 (c / country
      :name (n / name
        :op1 "North"
        :op2 "Korea"))
    :time (d / date-entity
      :month 11
      :year 2001))
  :domain (t2 / tour-01))
```

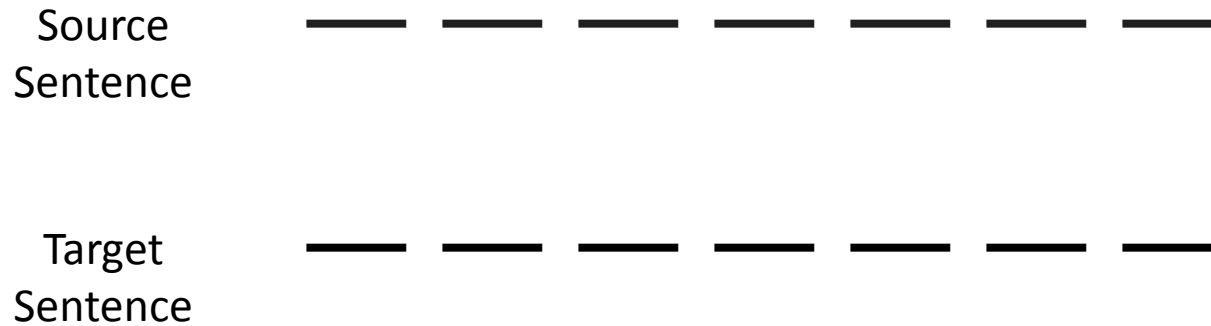

Mono-lingual parsing

- JAMR's aligner uses:
 - Edit distance based rules
 - WordNet similarity

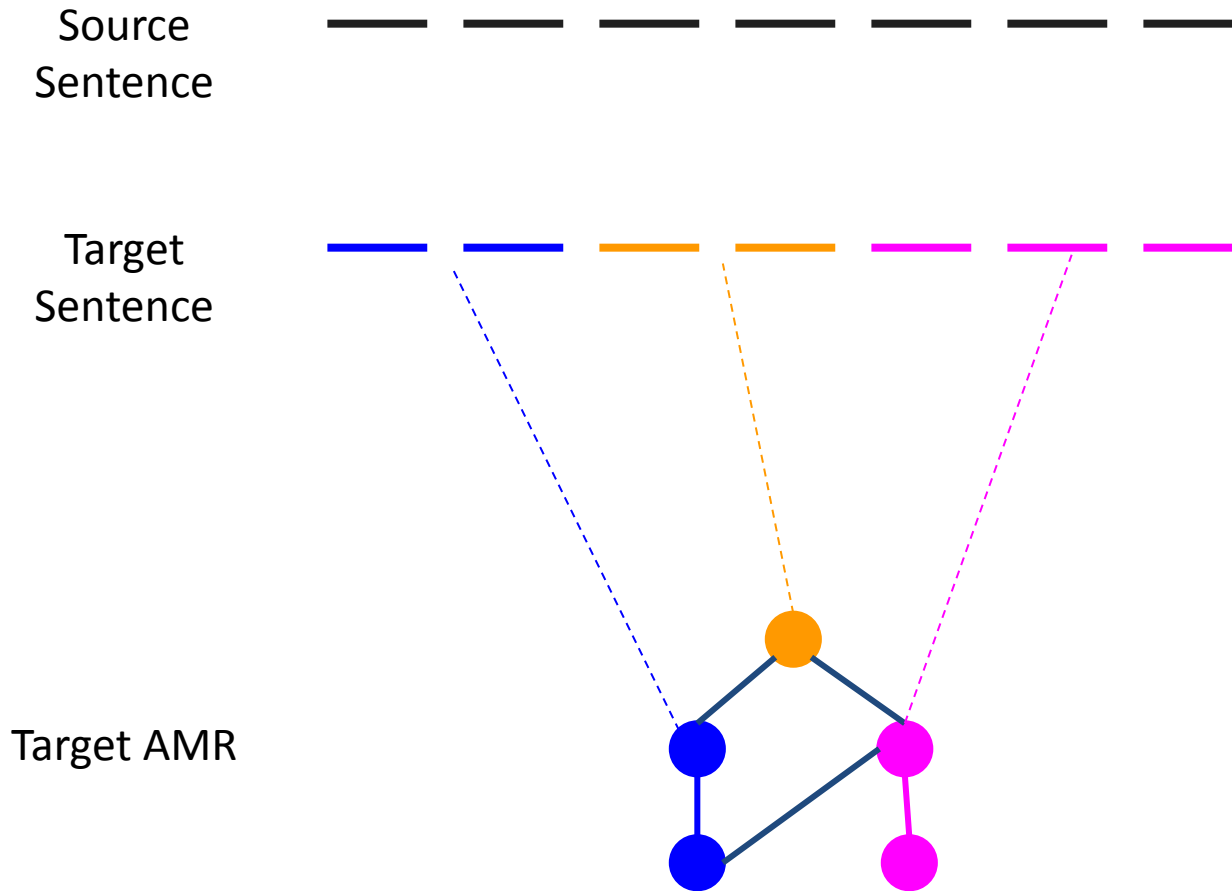

Cross-lingual parsing

- For cross-lingual parsing we need
 - alignments from a source language string to target AMR concepts

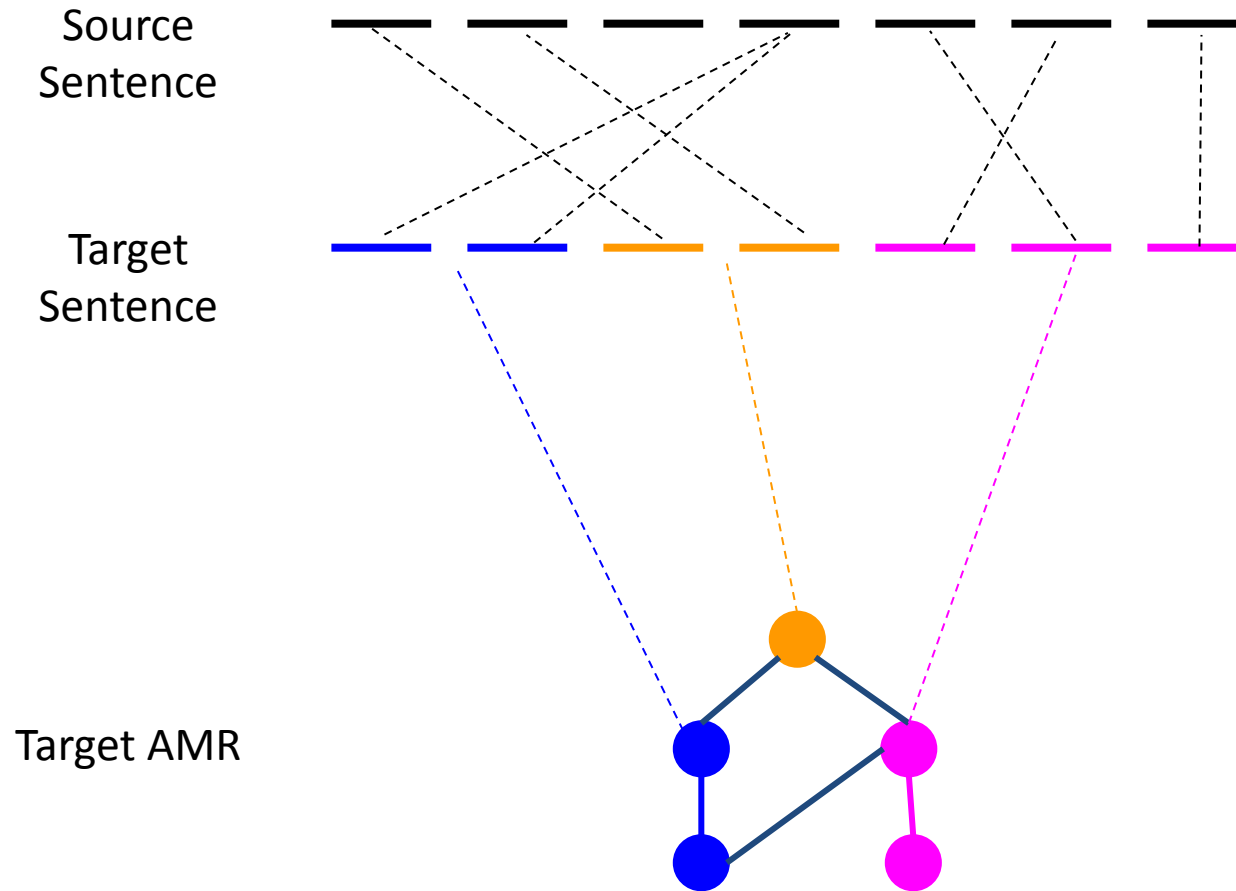

Raw Parallel Corpus

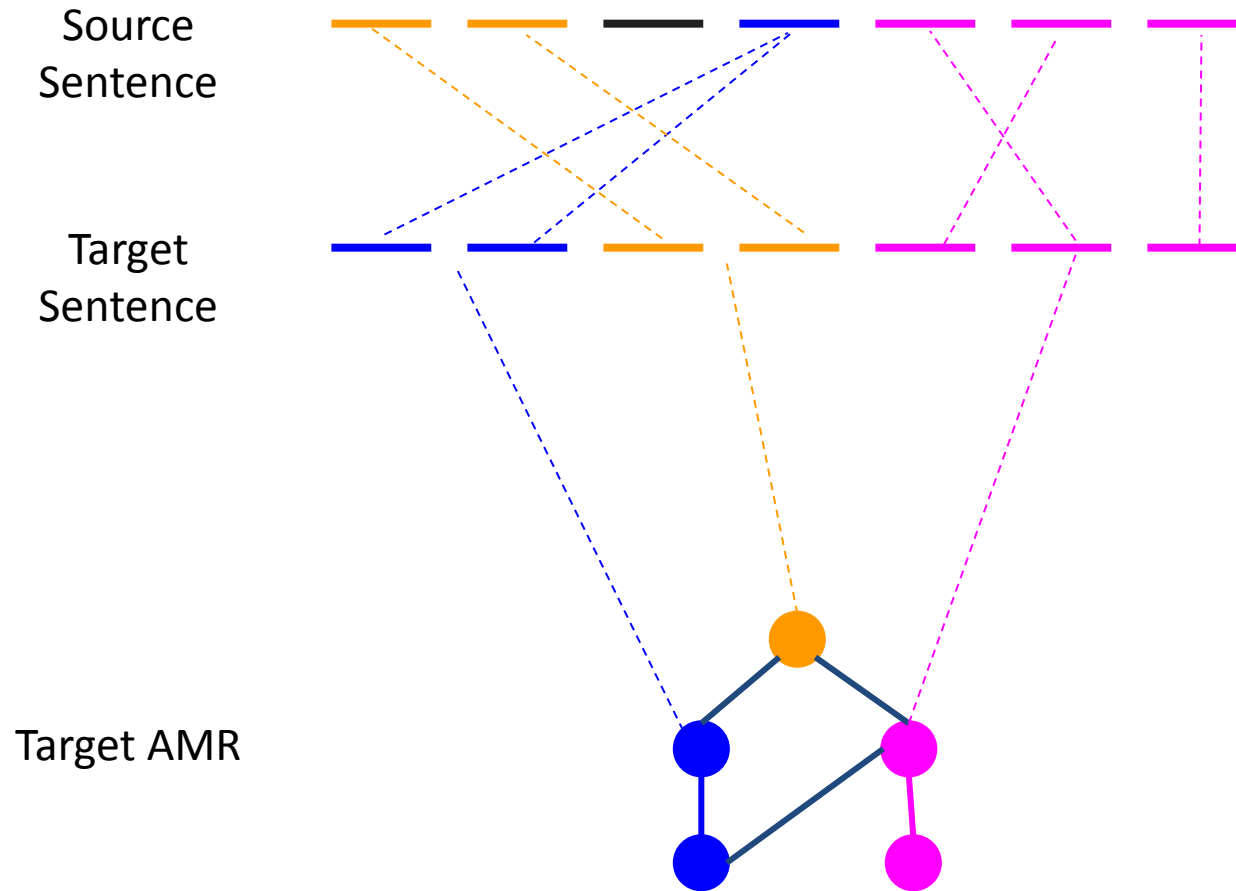

Run Target-Side JAMR

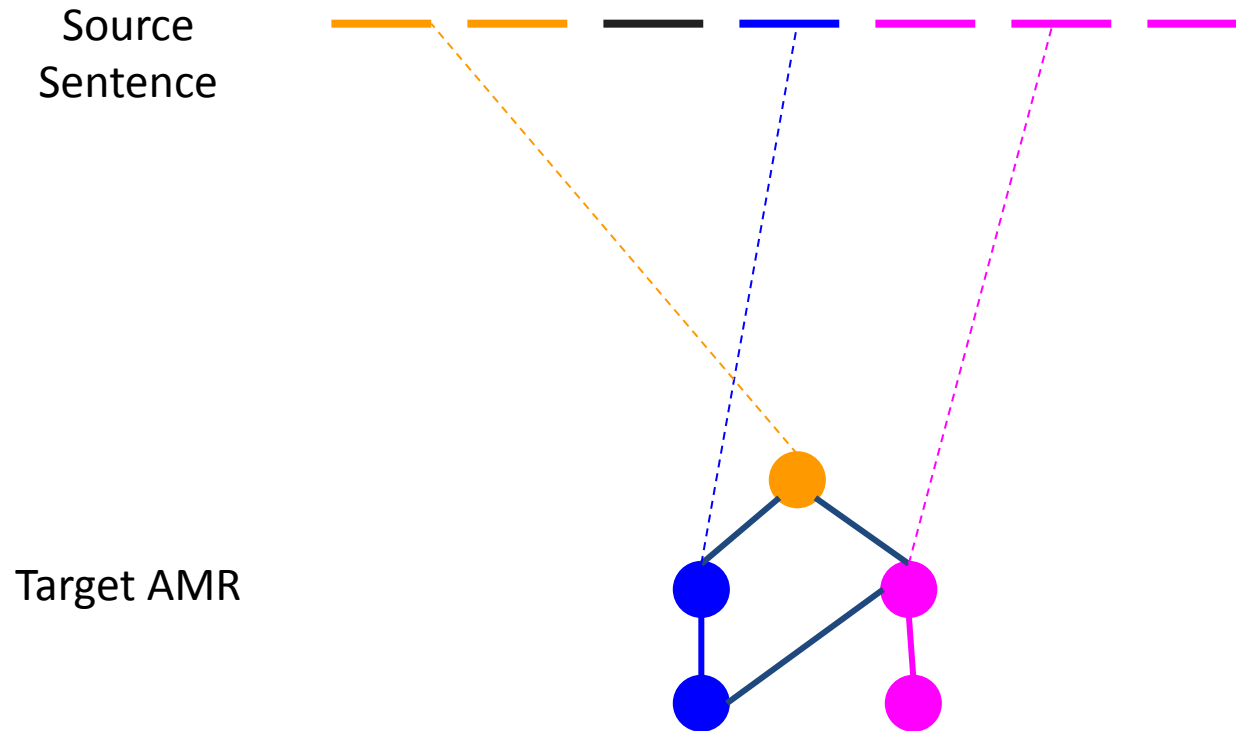

Word Align Source-Target

Project to AMR

Training Data for cross-lingual Parser

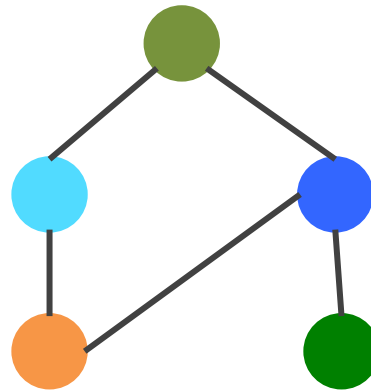

Experiment 2: Word Align to AMR

Data Used

- FBIS 300k Chinese-English parallel corpus
- More Details
 - Concept Table Extraction: 290k
 - Concept Id Weights: 10k (stage 1)
 - Relation Id Weights: 100 (stage 2)

他最后祝愿李鹏委员长访问各国取得圆满成功。

Lastly he wished chairman li peng every success in his visit to the other countries .

Gold AMR

(w / wish-01
:ARG0 (h / he)
:ARG1 (s / succeed-01
:ARG0 (p / person
:name (n2 / name :op1 "Li"
:op2 "Peng")
:ARG0-of (h2 / have-org-role-91
:ARG2 (c / chairman)))
:ARG1 (v / visit-01
:ARG0 p
:ARG1 (c2 / country
:mod (o / other))))))

Output AMR

(c2 / chairman
:ARG1 (v / visit-01
:ARG1-of (s / succeed-01)
:ARG3 (c / country
:mod (o / other))
:prep-as (e / every))
:ARG1-of (w / wish-01
:ARG0 (p / person
:name (n / name
:op "peng"
:op "li")))))

- Concepts from English side JAMR
- Relations from Cross-lingual JAMR

他最后祝愿李鹏委员长访问各国取得圆满成功。

Lastly he wished chairman li peng every success in his visit to the other countries .

Gold AMR

(w / wish-01
:ARG0 (h / he)
:ARG1 (s / succeed-01

Output AMR

(s2 / say-01
:ARG0-of (w / wish-01
:ARG1 (a / achieve-01
:ARG0 (c / country
:location (a2 / all))
:ARG1 (s / succeed-01
:ARG1 (t / this))))
:ARG1 (l / last))

- Concepts & Relations from Cross-lingual JAMR

Future Work

- Train stages with more data
- Error analysis
- Phrase alignment rather than heuristics over word alignment
- More language pairs
